Client Satisfaction

4.6/5.0
as of Q4 2022

Client Retention

92%*

*Customer receiving at least \$1000 of product per year

Product Portfolio

Our suite of medication packaging equipment includes a wide range of deblistering, sealing, printing and labeling solutions to help your pharmacy enhance operational efficiency.

Deblistering Equipment

Deblistering

The Omnicell Deblistering Machine helps you effortlessly remove medications from blister card packaging, simplifying a once-tedious task. Our Deblistering Machine is small and portable, yet sturdy and durable. It can be used to deblistering a variety of blister card types.

- Small and portable
- Hand-operated
- Deblisters the following dose cards: 30-, 31-, 32-, 60/62, 90
- Heavy-duty design
- Saves time and money

Sealing Equipment

SureSeal™

The Omnicell Sureseal Manual Heat Sealer is a programmable, manual sealer for pharmacies looking for an economic way to begin offering SureMed™ by Omnicell heat seal medication blister cards. The sealer is shipped completely assembled and includes a 2-up configured blister card paddle.

- Easy-to-set temperature controls with digital display
- Ergonomic design reduces the physical effort associated with repetitive manual sealing
- Timer and automatic pop-up platen
- Digital pressure indicator
- All settings are preprogrammed

Sealing Equipment

Autogen™

The Omnicell Autogen Automated Heat Sealer sets a new industry standard for automated heat sealers, helping your pharmacy enhance operational efficiency without requiring an air compressor. With the Autogen Automated Heat Sealer you can seal SureMed by Omnicell heat seal blister cards in under 4 seconds. Simply plug it into any standard 110V outlet to begin using its 500 pounds of sealing force.

- Whisper-quiet operation
- Safe two-handed operation to activate sealing mechanism
- Eliminates blister card pressure variants associated with manual sealing equipment
- Precision designed and CE-compliant components for hassle-free, reliable operation
- Enhanced airflow design creates lower heated-air emissions
- Rugged stainless steel and anodized aluminum construction allows for easy cleaning

Autobond™

The Omnicell Autobond Automated Heat Sealer is an excellent option when controlled and consistent heat sealing of medication blister cards is required at lower volumes. Temperature and time controls provide reliable, high quality automated heat sealing of SureMed by Omnicell medication blister cards.

- Easy-to-set temperature controls with digital display
- Internal timing relay eliminates under- or over-sealing
- Automatically opens when the cycle is complete
- Provides optimal sealing at minimum heat levels
- Each sealer is preset at 100 PSI for uniform pressure sealing
- Includes a standard 2-up configured blister card paddle
- Dual timer for blister card and unit dose sealing

Printing and Labeling Equipment

Unit Dose Printing System

The Omnicell Unit Dose Printing System meets the unique labeling needs of a long-term care or institutional pharmacy by providing printed label foil sheets to use when sealing single-dose blister cards. It is the only unit dose foil label printing system designed specifically for pharmacy operations.

- Easy-to-change plug and print head
- Accommodates diverse packaging needs including unit-dose box, short-cycle dispensing, reclaimable blister cards, e-kits, and automated dispensing cabinets
- Reduces waste by pre-packing expensive medications into reclaimable blister cards (where state regulations allow)
- Saves money compared to manufacturers unit dose

License Plate Printing System

Whether you need horizontal license plate labels for standard blister cards, vertical license plate labels for unit dose boxes, special labels for syringes, refrigeration, compounds or other items, the Omnicell Medication License Plate Printing System gives you the flexibility to create it all. The specialized design is simple. You can even provide quick and positive identification of controlled medications by producing solid black labels with white text.

- Easy-to-change plug and print head
- Label easily peels from backing, allowing for one-hand application
- Multiple label formats (pre-pack, extemporaneous, control, compound, unit dose box, oral syringe, refrigerated, day of the week and delivery time)
- Flexibility to use peel-and-present or batch printing options

Printing and Labeling Equipment

Label Conveyor

Using a high-speed conveyor system, the medication Label Conveyor Applicator is used immediately after the packing process to automate the application of the pre pack label. It prints, positions and applies the label onto the pre-pack card, ensuring that medication, dosage, expiration and other information is captured accurately and efficiently. Creating an automated medication pre pack labeling process can significantly save technician time.

- Cab A6 printer
- Conveyor with applicator interface
- EasyLabel software
- Laser scanner with cable and stand
- Variety of label formats available
- Setup and training

Partnering with Omnicell® Medication Adherence Puts Superior Outcomes Within Reach

“

Omnicell helps empower our operation's success by ensuring we can meet the delivery demands of all our customers despite how large we might grow, keep staffing at a minimum while still continuing to grow and impress potential new and new facilities with the technology we use to service them.”

- **Lisa Guibas, CPhT**
Director of Client Services, LI Script
