Company Profile

Omnicell is a leading provider of medication and medical supply management solutions that serves the entire continuum of care. Driven by a passion to improve patient care and outcomes – we deliver value to hospitals, health systems, post-acute care settings, and patients in the home, via state-of-the-art automated dispensing systems, enterprise inventory management, and medication adherence solutions.

Since 1992, Omnicell has been inspired to create safer and more efficient ways to manage medications and supplies across all care settings. Omnicell is revolutionizing the patient medication experience from hospital to home by empowering providers to keep each patient at the center of care.

In 2012, Omnicell introduced their medication adherence division by acquiring medication adherence packaging specialists, MTS Medication Technologies, located in St. Petersburg, Florida. In 2016, they added experts in patient engagement software, Ateb, in Raleigh, NC to the division. These facilities develop and manufacture over 1 million adherence blister cards a day along with a complete line of automated packaging equipment to support blister card fulfillment and software to manage patient engagement in pharmacies.

Omnicell's innovative medication adherence solutions, used by over 32,000 institutional and retail pharmacies in North America and the United Kingdom, are designed to improve patient engagement and adherence to prescriptions, helping to reduce costly hospital readmissions.

Omnicell Patient Engagement

Omnicell Patient Engagement is a single, web-based platform that hosts all functionality to guide and track patient interventions, appointments, and notes.

The Patient Engagement platform integrates with pharmacy management systems (PMS), facilitating bidirectional data flow. It also uses predictive analytics to prioritize patient interventions and pharmacy tasks.

Omnicell MTM (Medication Therapy Management)

Omnicell MTM supports high-efficiency pharmacy interventions to improve patient outcomes, reduce healthcare costs, and maximize pharmacy services profitability.

Solution Benefits

- Increases patient medication adherence rates

- Creates opportunity to expand revenue channels

- Integrates seamlessly with existing pharmacy workflow

- Improves overall MTM process efficiency

Omnicell Targeted Patient Interventions

Omnicell Targeted Patient Interventions deliver proactive outreach methods at the right time to high-value, at-risk patients to drive improved adherence and outcomes.

Solution Benefits

- Improve medication adherence

- Achieve better patient health outcomes

- Optimize patient retention

- Promote loyalty with enhanced customer service

- Increase script growth
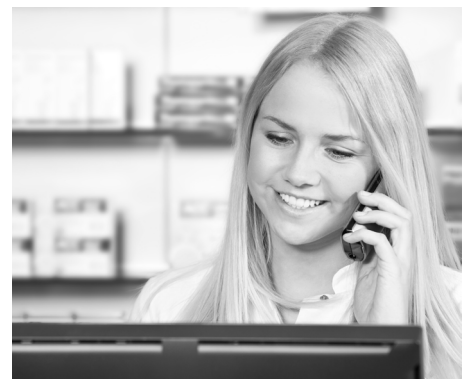

Omnicell Medication Synchronization

Raise PDC scores, reduce DIR fees, and retain more patients with
Omnicell Medication Synchronization

Getting Started

- Coordinates a patient's chronic prescriptions to be picked up at the same time each month

- Provides opportunity for pharmacy to intervene with the patient on a regular schedule

Next Steps

- Utilize big data and predictive analytics to find targeted patients to enroll into the program

- Integrate with your pharmacy management system (PMS) for bidirectional data flow between the PMS and the Omnicell Patient Engagement platform.

- Achieve near-perfect adherence/PDC (Proportion of Days Covered) scores

Omnicell Immunization Solutions

Drive sales and enhance your vaccination workflow with
Omnicell Immunization Solutions

Getting Started

- Target eligible patients for immunization interventions such as flu, pneumonia, shingles and more

Next Steps

- Query the state registry (where available)

- Automate reporting to the state registry

- Track and document vaccine administration

Omnicell Patient Communications

Save time, enhance engagement, and grow script volumes
with Omnicell Patient Communications

Getting Started
Maximize your profitability
through patient communications

- Omnicell IVR (Interactive Voice Response)

- Omnicell Inbound Patient Communications

- Omnicell Outbound Patient Communications

- Omnicell Hosted IVR

Omnicell IVR
Increases patient access to the pharmacy 24 hours /
7 days a week through automation, so you can maximize
your time and valuable resources for patient engagement.

Omnicell Inbound Patient Communications
Presents additional prescriptions that are due or overdue
to be filled when a patient successfully requests a refill,
increasing patients' average days on therapy by 8%.*

Omnicell Outbound Patient Communications
Deliver real-time, relevant messaging through automated patient outreach methods to increase
prescription sales, improve medication adherence, and reduce return to stock rates.

Omnicell Hosted IVR
The enhanced hosted IVR gives customers an agile platform to improve the patient experience
without the need for on-site hardware.

*8% increase pertains only to medications for which Omnicell Inbound Patient Communications are used

The Omnicell® VBM 200F is the only automated pharmacy solution that efficiently and accurately fills and checks SureMed® multiple medication blister cards. The VBM 200F ensures pharmacies have the competitive advantage to easily scale their business to improve adherence and patient outcomes today.

Increase Revenue. Decrease Expenses.

Free up pharmacy staff and reduce operating expenses.
- Throughput of 35-40 sealed and audited cards per hour
- Small-footprint, ergonomic design that fits through a standard doorway
- Ease of access for cleaning and maintenance
- Does not require compressed air and can run on 110V
- Extremely intuitive and easy-to-use interface

Accuracy You Can Trust

- The VBM 200F utilizes unparalleled and proven vision technology to verify every medication for each individual blister before the card is filled.
- Reduce Human Errors with Guided Light Manual Fill Trays
- Uninterrupted Workflow with ability to exchange/refill cassettes during production
- Process Tracking with Smart RFID Medication Trays
- Barcode Tracking Audit at the Workstation

Autogen™

The premier all electric, (no air required) heat sealer. Simply plug the Autogen™ into any standard 110 volt outlet to begin operation. The Autogen sets new industry standards for automated sealers - helping the pharmacy maintain operational efficiencies.

The Autogen's 500 pounds of sealing force allows for a 4 second seal on blister cards and a 2 second seal on unit dose foil and blisters. Its compact design frees up valuable pharmacy counter space. All timing functions are controlled via PLC (Programmable Logic Controller) to provide consistent quality sealing.

Benefits

- Electrically operated system, no compressed air required
- Accommodates 5/8″ thick paddle for standard 6″ x 9″ punch cards and 7/8″ thick paddle for SureMed by Omnicell multimed blister cards
- Safe, easy, two hand operation to activate sealing mechanism
- Eliminates pressure variants associated with manual sealing equipment
- Precision designed and CE compliant components for hassle free, reliable operation
- Easy access for cleaning of heat plate if needed
- Unit is shipped complete. All settings are pre-programmed

Features

- Provides over 500 pounds of sealing force
- Whisper quiet operation
- Air flow design creates lower heated air emissions
- Rugged stainless steel /anodized aluminum construction
- Adjustable time and temperature controls
- Removable, height adjusting base plate
- Dual timer for unit dose and blister card sealing
- Includes 1 standard configuration ″Blister Card Paddle″

Specifications

- **Height:** 13"
- **Width:** 14-1/8"
- **Depth:** 23"

Unit Dose

With the Omnicell Unit Dose foil labeling system, you can efficiently print, package and seal medications to be dispensed in varying quantities (from single dose to short-cycle to 30-day regimen). Along with providing the flexibility to package medications in multiple systems, Omnicell Unit Dose enables pharmacies to reduce waste, minimize labor, and control inventory.

Centralize Pre-Pack Inventory:

Omnicell Unit Dose provides the option to create a centralized inventory of prepackaged foil and blister for use in reclaimable and non-reclaimable blister cards, unit dose box, and E-kits for greater economies of scale.

Return & Reuse:

When used together, Omnicell Unit Dose and SelectSeal™ blister cards allow for the reclamation of unused medication in states where the return and reuse of unused medication is permissible. Med Cards are used to easily repackage medications into a blister card format.

One Package, One Inventory, Multiple Applications

E-Kits and Dispensing Cabinets   **Reclaimable Unit Dose (Select Seal™)**   **Unit Dose Box**

Blisters: We offer a variety of blisters in standard clear and amber.

201-10	Small
201-11	Medium
201-13	Large
203-16	Large Amber
201-13XL	Extra Large (Does not nest)
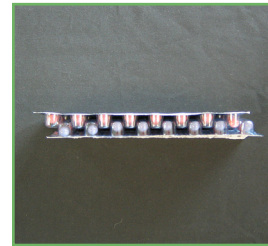

Note: **Standard Unit Dose Blisters are produced 32 per sheet (4x8).**
Select blister sizes are available in 14, 28, 30 and 31 dose.

Select Seal™ Cards: Designed with a special select seal adhesive and a perforated card for the recovery of unused medications without damaging the blister or printed foil.

Med Cards: Provides a permanent seal (cannot be re-heated) to the unit dose foil and blister. Used when there are a number of individual doses that have been returned and require repackaging.

Unit Dose Blisters: Blisters are perforated and can be separated into strips or individual unit dose. They are designed to nest and can be stacked on top of one another for maximum storage capacity.

MTS Unit Dose Foil Labeling System

This unit dose foil labeling system meets the unique needs of the long-term care pharmacy by producing high quality bar code scannable label sheets quickly and efficiently. It is the only foil printing system developed specifically for pharmacy operations and produces up to 18 sheets per minute.

The Windows-based software is reliable and easy-to-use. Simply enter in the lot number and expiration date, then scan the medication NDC barcode. Additional data entry is also possible, including alternate drug names and customized fields. Changing to 1/2 tabs and 1/4 tabs, for example, is a simple process with "hot-key" field editing. The software also enables you to view the labels before you print.

The printable production report simplifies the process of tracking your pharmacy's daily packaging activity.

The system includes:
- Tharo H626 - 203dpi Thermal transfer printer
- H626 rotary cutter
- Labeling software program with database and report generator
- Barcode scanner with cable and stand
- Printhead cleaning kit
- Communication cable
- Initial set-up and training

Customer Furnished:
Computer – Windows 7 or higher
Standard printer for reports

Usage:
This high-speed durable printer prints up to 18 sheets of Omnicell foil (576 unit doses) per minute. It is used for packaging efficiency or when barcode printing is required. It automatically cuts the foil to size, ready for direct application to the unit dose blister. The printer can be used as a standalone system or in conjunction with Omnicell automation.

Growing with Single-Dose Packaging

Printing Solutions

Labeling Software

Easy Label software interfaces with three types of printers to simplify the process of printing the following:

- Unit Dose Foil
- License Plate Labels
- PillVue Color Labels

This reliable and easy-to-use Windows-based software supports multiple styles of packaging used in long-term care pharmacy including unit dose, standard punch cards, and specialty items such as labels for syringes and controlled medications. The software's unique MVP (multi-view printing) feature allows simultaneous viewing and printing of up to three labels or foils to streamline the packaging process.

- FDA 21 CFR Part II compliant
- 2D barcode ready
- Windows XP & Windows 7 compatible 16 Digit, RSS/GS1 barcode and RFID capable
- Network and Terminal server versions available

Software Options

Single User - Supports 3 printers per workstation*.

Terminal - Supports multiple printers from multiple workstations among multiple locations.

Network - Supports multiple printers from multiple workstations within a single location.

*When connected via USB, serial, or parallel port, the maximum distance between the computer and any one of the printers is 15 feet (does not apply to Ethernet communication.)

- Printhead cleaning kit
- Communication cable
- Initial set-up and training

This license plate labeling system is perfect for the long-term care pharmacy that requires bar code scannable labels in multiple label formats. This stand alone system features easy-to-use custom labeling software. Whether you need horizontal labels for standard punch cards, vertical labels for unit dose boxes, special labels for syringes, refrigeration, compounds, etc. - this system gives you the flexibility to create it all. Specialized design is simple, and you can even provide quick and positive identification of controlled medications by producing solid black labels with white text.

The thermal transfer printer can produce one label at a time for on-the-spot label application or produce an entire roll of labels for application at another work station.

You can also use this system to create your own bar codes to track previously non-bar coded inventory items, and print production reports to track your pharmacy's daily packaging activity.

See page 64 & 65 for License Plate Labels

PillVue™ Color Labeling System

PillVue™ Color Labeling System captures high-resolution images of medications, which are used to produce full-color labels for faster, more accurate verifications. MVP (multi-view printing) software allows simultaneous viewing and printing of license plate labels, pill image labels, and foils to streamline the packing process.

The PillVue System Includes:
- Color label printer
- Starter ink and labels
- Camera system
- Barcode imaging scanner
- Starter drug database and images
- Communication cables
- Initial set-up and training

Printer Features:
- Print Speeds of up to 4.5" per second
- High-resolution color print images
- Fast dry semi-gloss photo labels
- Easy load 4 ink cartridge system
- MVP software and add-on printer capable

Camera Features:
- High-resolution Camera
- Built in LED light source with polarizer
- Easy focus adjustments on camera
- Black-light lighting system system with polarizer
- Adjustable stand
- XY Base adjustment

Computer and monitor NOT included.
Foil printer additional.

PillVue™ Label

Standard Label

Crystal clear images make verification more accurate and less time consuming.

The Pre-pack Label Applicator automates the labeling process for your pre-pack operation and significantly reduces needed technician time.

Using a high-speed conveyor system, the Pre-Pack Label Applicator is used immediately after the packing process to automate the application of the pre-pack label. It prints, positions, and applies the label onto the pre-pack card, ensuring that medication, dosage, expiration, and other information is captured accurately and efficiently. Automating the pre-pack labeling process can significantly save technician time.

Key benefits include:

- Ability to reallocate labor to higher-value tasks by eliminating manual printing and application of labels
- Ability to track individual technician productivity with the technician production report
- Ability to track inventory with the inventory production report

MTS-350™

Combining semi-automated filling and sealing processes, our MTS-350 provides a versatile pre-pack solution for the long-term care pharmacy.

Benefits
- Packages up to 10 times faster than packaging by hand
- Designed for less repetitive operator motion
- Robust automated sealing station eliminates blister card pressure variants
- Temperature and time controls provide consistent quality sealing

Features
- Packages a wide variety of card styles and foils to meet a
- variety of needs
- Motorized medication filling system with adjustable speed and easy to change brushes
- Tool-less changeover of the filling system
- Seal station automatically opens when the cycle is complete
- Easy-to-read digital temperature controller
- Stainless steel and anodized aluminum construction allow for easy cleaning
- Easy access for cleaning of heat plate
- Dual timer for unit dose and blister card sealing

Recommended Accessories
- 10-50 Ft. Hoses #G-1025, G-1023, G-1024
- T-Assembly #G-1022
- Stiff Brush #400-00
- Soft Brush #400-01
- Extra Soft Brush #400-05

Specifications
- **Height:** 33" (over filler)
- **Width:** 37-7/8"
- **Depth:** 28"
- **Weight:** 112 lbs
- **Electrical:** 110 VAC, 7Amps
- **Compressed Air:** 100 PSI, 2SCFM
- **Sealing Time:** Adjustable: Standard Blister Card / 4 seconds, Unit Dose / 2 seconds
- **Temperature Range:** 90°- 400° Fahrenheit
- **Service Contracts:** Annual service contracts are available
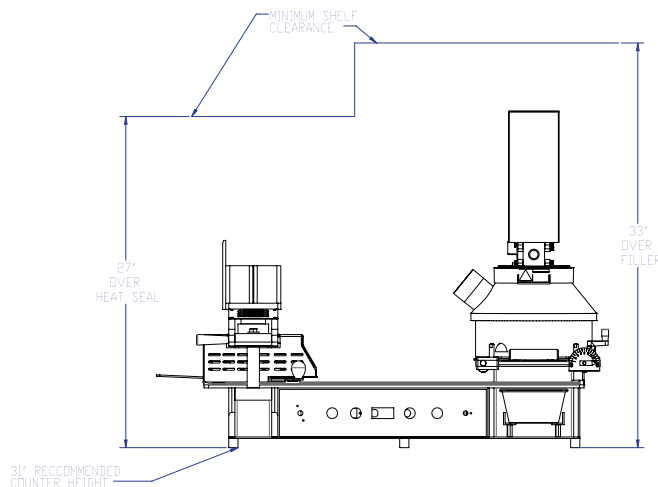

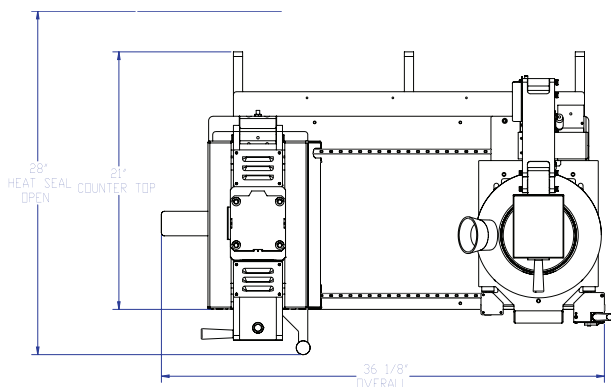

MTS-500™

Designed to streamline packaging for the larger long-term care pharmacy, our MTS-500 is capable of producing approximately 850[1] completed medication blister cards per hour.

Benefits

- Packages up to 34 times faster than packaging by hand
- High-volume throughput with a semi-automated system
- Temperature and time controls provide consistent quality sealing
- Robust automated sealing station eliminates blister card pressure variants
- Optimal sealing at minimum heat levels
- All settings are pre-programmed

Features

- Motorized medication filling system with adjustable speed and easy-to-change brushes
- Tool-less changeover of the filling system
- Easy-to-read digital temperature controller
- Stainless steel and anodized aluminum construction allows for easy cleaning
- Optional in-line printing system for pre-pack labeling and bar coding

Specifications

- **Height:** 66"
- **Width:** 74-1/4" with printer
- **Depth:** 86-1/4" with printer
- **Weight:** 1200 lbs
- **Electrical:** 240 VAC, 1Phase, 20 Amps
- **Compressed Air:** 100 PSI, 15 SCFM
- **Temperature Range:** 90°- 400° Fahrenheit
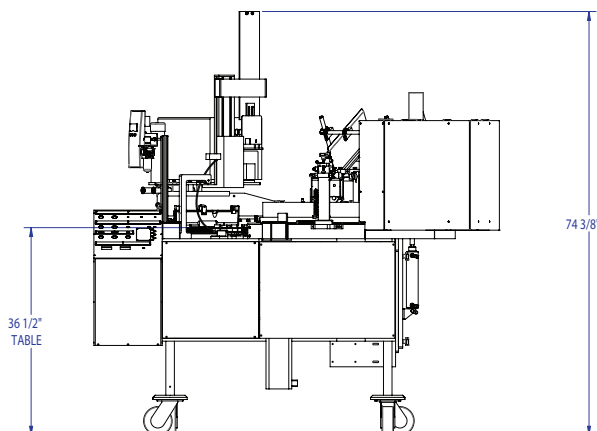

Recommended Accessories

Deblistering Machine

Save time and money on medication removals using our easy-to-use deblistering machine.

Benefits
- Reclaims medications for disposal
- Saves time and money

Features
- Small and portable
- Hand operated
- Removes medication easily from punch cards
- Heavy duty design

Specifications
- **Height:** 12"
- **Width:** 9.25"
- **Depth:** 16"
- **Weight:** 25 lbs
- **Material:** Stainless steel and anodized aluminum

Available for Omnicell Standard and Omnicell DOSIS cards.

Custom dies are also possible. **Call us for a quote 800-671-0589**.

Label Conveyor Applicator

The LCA System enables you to capitalize on the efficiencies of the MTS-350 and MTS-400 with the addition of a high-speed label application system to significantly increase the speed of the labeling process.

Omnicell Accuflex

Flexible, patient specific, automated packaging for the long-term care (LTC) pharmacy. The AccuFlex® combines proven Omnicell OnDemand technology with Fanuc Robotics to create accurate and efficient automation with the flexibility to fill a variety of medication packaging on demand.

Omnicell OnDemand® automation interfaces with your existing pharmacy information system to enhance scheduling and workflow management and improve accuracy and production of medication packaging. Omnicell AccuFlex® allows a pharmacy to fill cards as soon as medication orders are received, rather than pre-packing medications in anticipation of future orders, leading to decreased inventory costs and increased pharmacy cash flow.

Benefits

- Improved operational efficiency and inventory management
- Scaleable cassette selection, custom-fitted to your operation
- Efficiently package different medication systems with a single piece of automation
- Low maintenance, reliable components and proven technology
- Patented design optimizes output and accuracy
- Intuitive software that is flexible enough to accommodate your operational environment

One Machine to Automate the Packaging of Multiple Systems
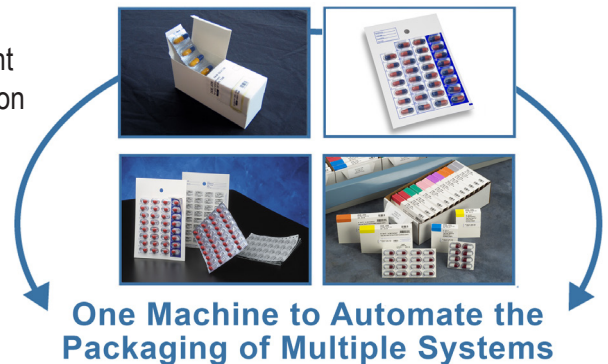

Features

- Provides on-demand order fulfillment for different dispensing cycles and partial fills
- Accessibility to an unlimited number of cassettes depending on individual pharmacy needs
- Quick changeover from one type of packaging to another
- Integrated robotics, proven OnDemand technology and high-speed linear motors
- Interfaces with most commercial pharmacy information systems
- Flexible order processing to accommodate sorting by batch, time, facility or patient
- Pneumatic sealing and automated prescription label applicator

Discover how automation can help decrease medication inventory costs and increase pharmacy cash flow.
Call one of our sales consultants at 800-671-0589.

The Express II fills patient-specific punch cards creating a made-to-order solution for pharmacy customers.

The Express II is high-speed pharmacy automation that is designed to:

- Maximize workflow
- Improve pharmacy productivity
- Increase profitability

The Express II system includes: high-speed packaging technology, software, reports, formulary management, inventory management, cards, blisters, labels, labeling system, installation, training and support.

Benefits

- Verification system ensures all cassettes are managed by the system and maintains medication inventory
- Allows just-in-time ordering of medications to help increase inventory cost savings
- Ability to grow your pharmacy business without adding additional personnel

Features

- Highly accurate at a speed of 10 cards per minute
- Patient-specific card filling
- Fully automates the process from medication selection to the finished product
- Fully interfaces with the Pharmacy Information System
- Automated bar code verification and tracking
- Generates detailed and custom reports

Find out how OnDemand Express II can measurably increases a pharmacy's throughput. **Call 800-671-0589.**

Medication Cabinets

Improve Medication Access and Operational Efficiency

Long-term care providers are increasingly seeking the benefits of automated medication and supply systems for their sites. Such systems aid in regulatory compliance and security, and help increase quality of care for residents by enabling faster access to first doses, new medication orders, and emergency medications.

Omnicell® automated medication and supply cabinet systems enable timely access to needed medications at the point of care. Instead of managing multiple e-kits, authorized caregivers can access most medications from the Omnicell automated medication cabinet, which easily stores 200 to 300 different items or more depending on the configuration. This system reduces stat deliveries and back-up pharmacy costs by enabling first doses, new orders, and emergency medications to be issued from the Omnicell automated cabinet.

Benefits

Reduced Costs – Eliminate time consuming e-kits and reduce the need for stat deliveries for fulfilling first doses, new orders, and emergency medications.

Improved Charge Capture – Labor-intensive manual billing is replaced with an accurate, automated process, including the ability to charge by NDC as an item is removed.

Promotes Clinical Quality – Patients will have faster access to medications. The LTC facility can more effectively handle changes in patient flow and drug regimens for higher-acuity patients.

Compliance – The system makes it easier to manage and monitor chain of custody and medication use, and helps meet Joint Commission and other regulatory requirements.

Why Choose Omnicell for Long-Term Care?

Omnicell offers a tailored system for long-term care pharmacy infrastructure and a collaborative implementation model that minimizes installation time.

- A single server supports a secure plug-and-play Internet connection at each long-term care site.
- No hassle of modems and VPN connections.
- Hosted server option available.
- ADT, billing, and profile interfaces provide advanced functionality.

Omnicell System Features

Guiding Lights Technology – Quickly directs the user to the desired location in the cabinet.

Anywhere RN™ Remote Medication Management Software – Allows caregivers to queue up medications remotely, saving time and energy.

Integrated Medication Label Printer – Print patient-specific labels right from the cabinet to prevent mix-ups and meet Joint Commission requirements.

Touch & Go™ G4 Biometric ID System – Fast, secure access to the cabinet via fingerprint scan.

OmniExplorer – View inventory in all Omnicell cabinets to adjust stock and get emergency supplies.

Omnicell System Feature

Omnicell cabinets come in a variety of sizes and formats. They can be custom configured with different drawer types in varying degrees of security. A few examples are shown here.

Locking Lid Drawer
A high security option

Lighted Matrix Drawer
Adjustable bin dividers
offer flexibility

Medication/Supply Drawer
Includes easy-to-use reorder buttons

Cover Up Labels Now Available!

Tired of Scraping Off Old Script Labels on Returns? What a waste of time, effort and money. Omnicell now offers cover up or blackout labels. Simply cover up the old label with one of these blank white labels and place another RX script label on top of it. Our specially designed cover up labels have a special adhesive with black ink added so it blacks out any wording or information below the label and allows you a clean slate to place your new label on. These custom labels are made to order and can be made to fit over any label you use. **Call our label specialist today for a quote 1-800-671-8439.**

Item # L-031A

BOXED WARNING MEDICATIONS
This medication has a Boxed Warning, the strongest warning mandated by the FDA, which indicates a need to closely evaluate and monitor the potential benefits and risks of the medication.

Item # L-031B

Anti-anxiety
Observe the patient closely for significant side effects.
SIDE EFFECTS: - Sedation, Drowsiness, Ataxia (drunk walk), Dizziness, Nausea, Vomiting, Confusion, Headache, Blurred Vision, Skin Rash.
SPECIAL ATTENTION: If given with other sedatives or hypnotics, alcohol.

Item # L-031C

Antipsychotic
Observe the patient closely for adverse reactions.
COMMON SIDE EFFECTS: sedation, weight gain, dry mouth, constipation, increased salivation, urinary incontinence/retention, anxiety, gynecomastia
SERIOUS SIDE EFFECTS: movement disorders (EPS), severe hypotension, tardive dyskinesia, diabetes, seizures, priapism, QT prolongation, blood dyscrasias, NMS
BLACK BOX: increased risk of death in elderly dementia patients.

Item # L-031D

Sedative/Hypnotics
Observe the patient closely for significant side effects.
SIDE EFFECTS: Common - Sedation, Drowsiness, Morning Hangover, Ataxia (drunk walk).
SPECIAL ATTENTION: If given with other sedatives or hypnotics and alcohol.

Item # L-031E

Selective Serotonin Reuptake Inhibitors
Common Side Effects: Nausea, nervousness, agitation or restlessness, drowsiness, insomnia, dizziness, weight fluctuations, headache, dry mouth, vomiting and or diarrhea
Serious Side Effects: Serotonin Syndrome
BLACK BOX WARNING: Patients of all ages who are started on antidepressant therapy should be monitored appropriately and observed closely for clinical worsening, suicidality, or unusual changes in behavior.

Item # L-031F

Atypical Antipsychotics
Increased mortality in the elderly patients with dementia-related psychosis (approx. 1.5 times greater than placebo) makes these drugs unapproved for treatment of dementia-related psychosis in the elderly. Frequent (greater than 2%) adverse reactions include agitation, akathisia, constipation, dizziness or drowsiness, EPS, hyper/hypotension, insomnia, nausea, tachycardia and weight gain (adapted from Facts & Comparisons).

Item # L-031G

Look Alike/ Sound Alike Drug
CAUTION: This drug has one or more look alike/sound alike drugs which may be confused for this drug. Verify this drug to the original order.

Item # L-031H

Anti-Depressant
Observe the patient closely for significant side effects.
SIDE EFFECTS: - Common - Sedation, Drowsiness, Dry Mouth, Blurred Vision, Urinary Retention, Tachycardia, Muscle Tremor, Agitation, Headache, Skin Rash, Photsensitivity (skin). Excess Weight Gain.
SPECIAL ATTENTION FOR: Heart Disease, Glaucoma, Chronic Constipation, Seizure Disorder, Edema.

Each is rolled 1,000 per roll. Sold by roll. Color may vary slightly.

Software Specific Labels: Below are the major pharmacy software systems used in the LTC pharmacy market. For each software vendor we have associated custom dies and label orders that have been run recently. When deciding on or creating a new label design, use the illustrated drawings as a starting point. Both the die and the software compatibility already exist.

HBS (Health Business Systems) Software Labels
