

# How can you improve performance on CMR completion rates and other quality measures?

## Omnicell MTM

The Omnicell next-generation MTM (medication therapy management) solution enhances pharmacy network performance by providing automation-assisted medication therapy problem resolution with a comprehensive view of ongoing member engagement.

### Manage Member Health

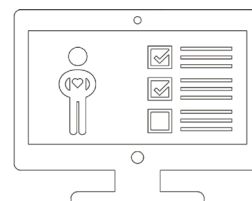

Our CMS-Compliant MTM platform offers:

- Omnicell MTM, Medication Synchronization, and Targeted Patient Interventions integrated on the Omnicell Patient Engagement platform supporting multiple interventions with a comprehensive view of the member
- Industry-leading, intuitive workflow with clinical decision support, making the delivery of a high-quality CMR more efficient for the pharmacist
- Personal Medication Lists (PML) and Medication Action Plans (MAP) in a CMS-standardized format
- Targeted Medication Reviews (TMR) that are focused on specific or potential medication-related problems

### Solution Benefits

- Increases CMR completion rates
- Improves quality measure performance
- Helps achieve better member health outcomes
- Avoids costly hospital readmissions
- Reduces overall healthcare costs

## Omnicell Patient Engagement

Only Omnicell provides a single platform to pharmacies to manage all member engagement, including:

- Medication Synchronization
- Immunization Solutions
- Targeted Patient Interventions
- Chronic Care Management
- Medication Therapy Management (MTM)
  - Comprehensive Medication Reviews (CMR)
  - Targeted Medication Reviews (TMR)

## Impact on Overall Health Outcomes

Omnicell offers our pharmacy partners the technology and automation to improve efficiency, ease scalability of CMR completion, and advance patient care delivery.
