

How can you improve accountability of controlled substances?

Omnicell XT Controlled Substance Manager for AcuDose-Rx Automated Dispensing Cabinets

The ability to track controlled substances throughout the healthcare facility is critical to meeting government regulations—and also has patient safety implications.

The XT Controlled Substance Manager from Omnicell supports the daily challenges of managing controlled medications by automating manual processes. Using up-to-date technology and a user-friendly interface, this system now provides closed-loop restocking for AcuDose-Rx® Automated Dispensing Cabinets, giving you a more efficient way to manage controlled substance inventory.

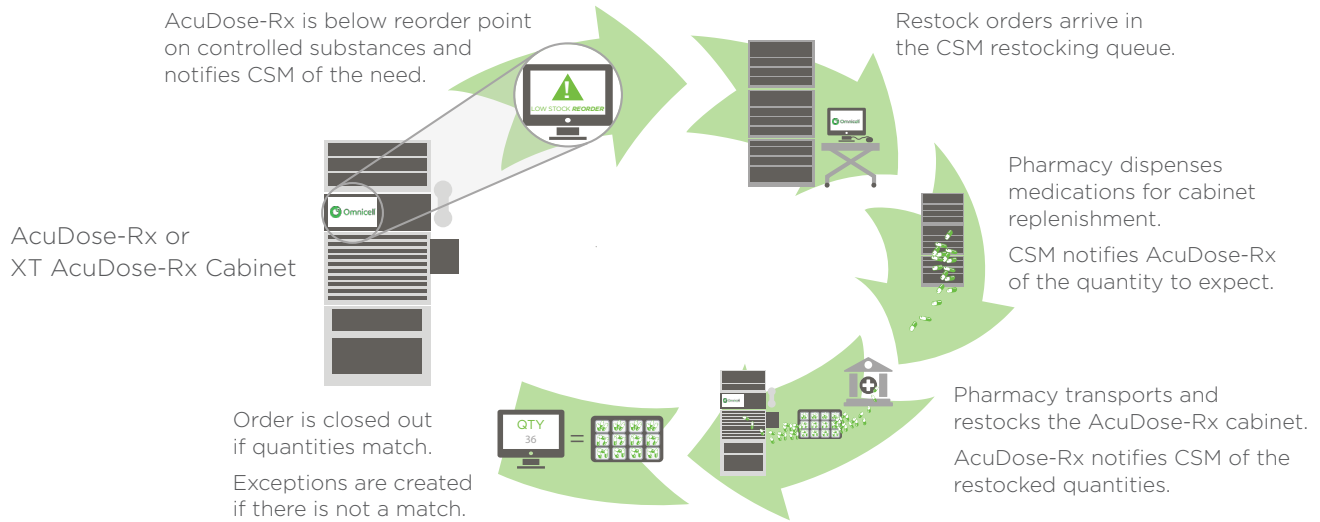

- Automates process for replenishing controlled substances in cabinets
- Provides secure storage and electronic traceability
- Facilitates repackaging of bulk amounts into unit doses with efficiency and accuracy

Closed-Loop Restocking for Omnicell Anesthesia Workstation

In addition to integrating with AcuDose-Rx cabinets, the XT Controlled Substance Manager also provides closed-loop restocking for the Omnicell® Anesthesia Workstation™, a market-leading solution for managing and securing medications and supplies in the operating room.

Closed-Loop Restocking Process with Controlled Substance Manager (CSM)

Latest Omnicell XT Automated Dispensing Cabinet Technology

Space-efficient – Industry-leading capacity promotes optimal storage, improving efficiency
