Prime Healthcare Expands Existing Partnership with Omnicell to Serve a Majority of Facilities Within the Health System

XT Series Medication and Supply Management Solutions to Help Increase Capacity and Improve Workflow

MOUNTAIN VIEW, Calif., Sept. 28, 2017 /PRNewswire/ -- Omnicell, Inc. (NASDAQ: OMCL), today announced that Prime Healthcare, a 45-hospital network serving 14 states, is implementing the Company's new XT Series automated medication dispensing systems in seven hospitals, expanding Omnicell's presence to over half of the facilities within its health system.

Prime Healthcare is also adding anesthesia and supply offerings to the suite of Omnicell® solutions used in select sites. Implementing these state-of-the-art solutions can enable Prime Healthcare to increase medication and supply storage capacity and improve provider workflows.

In today's evolving healthcare industry, health systems are realizing the benefits of applying the latest technology to streamline inventory management and optimize providers' ability to deliver excellent care. Within Prime Healthcare's network, adding the Omnicell XT Series Automated Dispensing Cabinets and Anesthesia Workstation™ will help promote safe, secure, and efficient processes and allow the facilities to manage more medications on the patient floors through increased capacity in the same physical footprint.

"As our health system continues to grow and evolve to meet new challenges, we rely on technologically advanced solutions to help us optimize our existing resources and operations, so we can spend more time focusing on our patients," said Ravi Reddy Alla, vice president of Professional Services, Prime Healthcare. "We were impressed by the design and increased capacity of Omnicell's new XT series, and look forward to furthering our relationship with their organization."

Select hospitals in the health system are introducing the XT Anesthesia Workstation™ to help improve medication security and safety in anesthesia procedure areas. This automated system gives anesthesia providers instant access to medications while keeping controlled substances secure and tracking inventory used. Additionally, following the recent launch of the XT Automated Supply Dispensing Cabinets, several facilities within the health system will implement this flexible supply chain solution. The new supply cabinets create greater efficiency for nursing staff through more responsive touchscreens, new storage components for organizing medical supplies and increased capacity, which helps prevent stockouts.

"Over the past five years of working across Prime Healthcare's network, we've continued to be impressed by their dedication to deliver excellent care to their communities," said J. Christopher Drew, president of North American Automation and Analytics, Omnicell. "Through our XT Series, we look forward to helping both existing and new partners within the health system to optimize medication and supply chain distribution processes to streamline workflows for caregivers and their patients."

About Prime Healthcare

Prime Healthcare is an award-winning national hospital system with 45 acute-care hospitals providing nearly 44,000 jobs in 14 states. Fourteen of the hospitals are members of the Prime Healthcare Foundation, a 501(c) 3 public charity. Based in California and one of the largest hospital systems in the country, Prime Healthcare is committed to ensuring access to quality healthcare. Prime Healthcare and its hospitals have been recognized as among the "100 Top Hospitals" in the nation 38 times and among the "15 Top Health Systems" three times, and Prime is the only "10 Top Health System" west of the Mississippi. About Omnicell

Since 1992, Omnicell (NASDAQ: OMCL) has been inspired to create safer and more efficient ways to manage medications and supplies across all care settings. As a leader in medication and supply dispensing automation, central pharmacy automation, IV robotics, analytics software, and medication adherence and packaging systems, Omnicell is focused on improving care across the entire healthcare continuum—from the acute care hospital setting, to post-acute skilled nursing and long-term care facilities, to the patient's home.

Over 4,000 customers worldwide use Omnicell® automation and analytics solutions to increase operational efficiency, reduce medication errors, deliver actionable intelligence and improve patient safety.

Omnicell's innovative medication adherence solutions, used by over 32,000 institutional and retail pharmacies in North America and the United Kingdom, are designed to improve patient adherence to prescriptions, helping to reduce costly hospital readmissions.

Recent Omnicell acquisitions, including Ateb, add distinct capabilities, particularly in central pharmacy, IV robotics, and pharmacy software, creating the broadest medication management product portfolio in the industry.
