

Close the Loop on Safety and Security of Medications in the OR

ENSURING SAFETY, SPEED, AND SECURITY

In the operating room, anesthesia providers constantly need to balance patient care and the administrative tasks that come with managing medication safety.

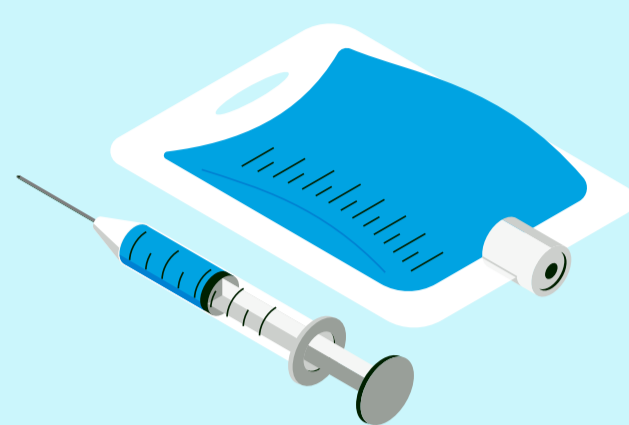

At the same time, Pharmacy must maintain accountability for the controlled substances being dispensed.

How can you support fast, efficient care while maintaining accountability?

Why OR Automation

Hospitals that leverage technology and employ safer distribution systems see:

ANESTHESIA PROVIDER BENEFITS

Eliminate Double Documentation
No need to document medication administration in EHR and Anesthesia Workstation

Eliminate Zero Waste Documentation
Zero waste, which is typical for 80% of dispenses, is automatically accounted for – no action is needed

20%
Time Savings

PHARMACY BENEFITS

Reduce Time Spent Resolving Discrepancies
Streamline investigating and auditing processes with a holistic view of provider activity

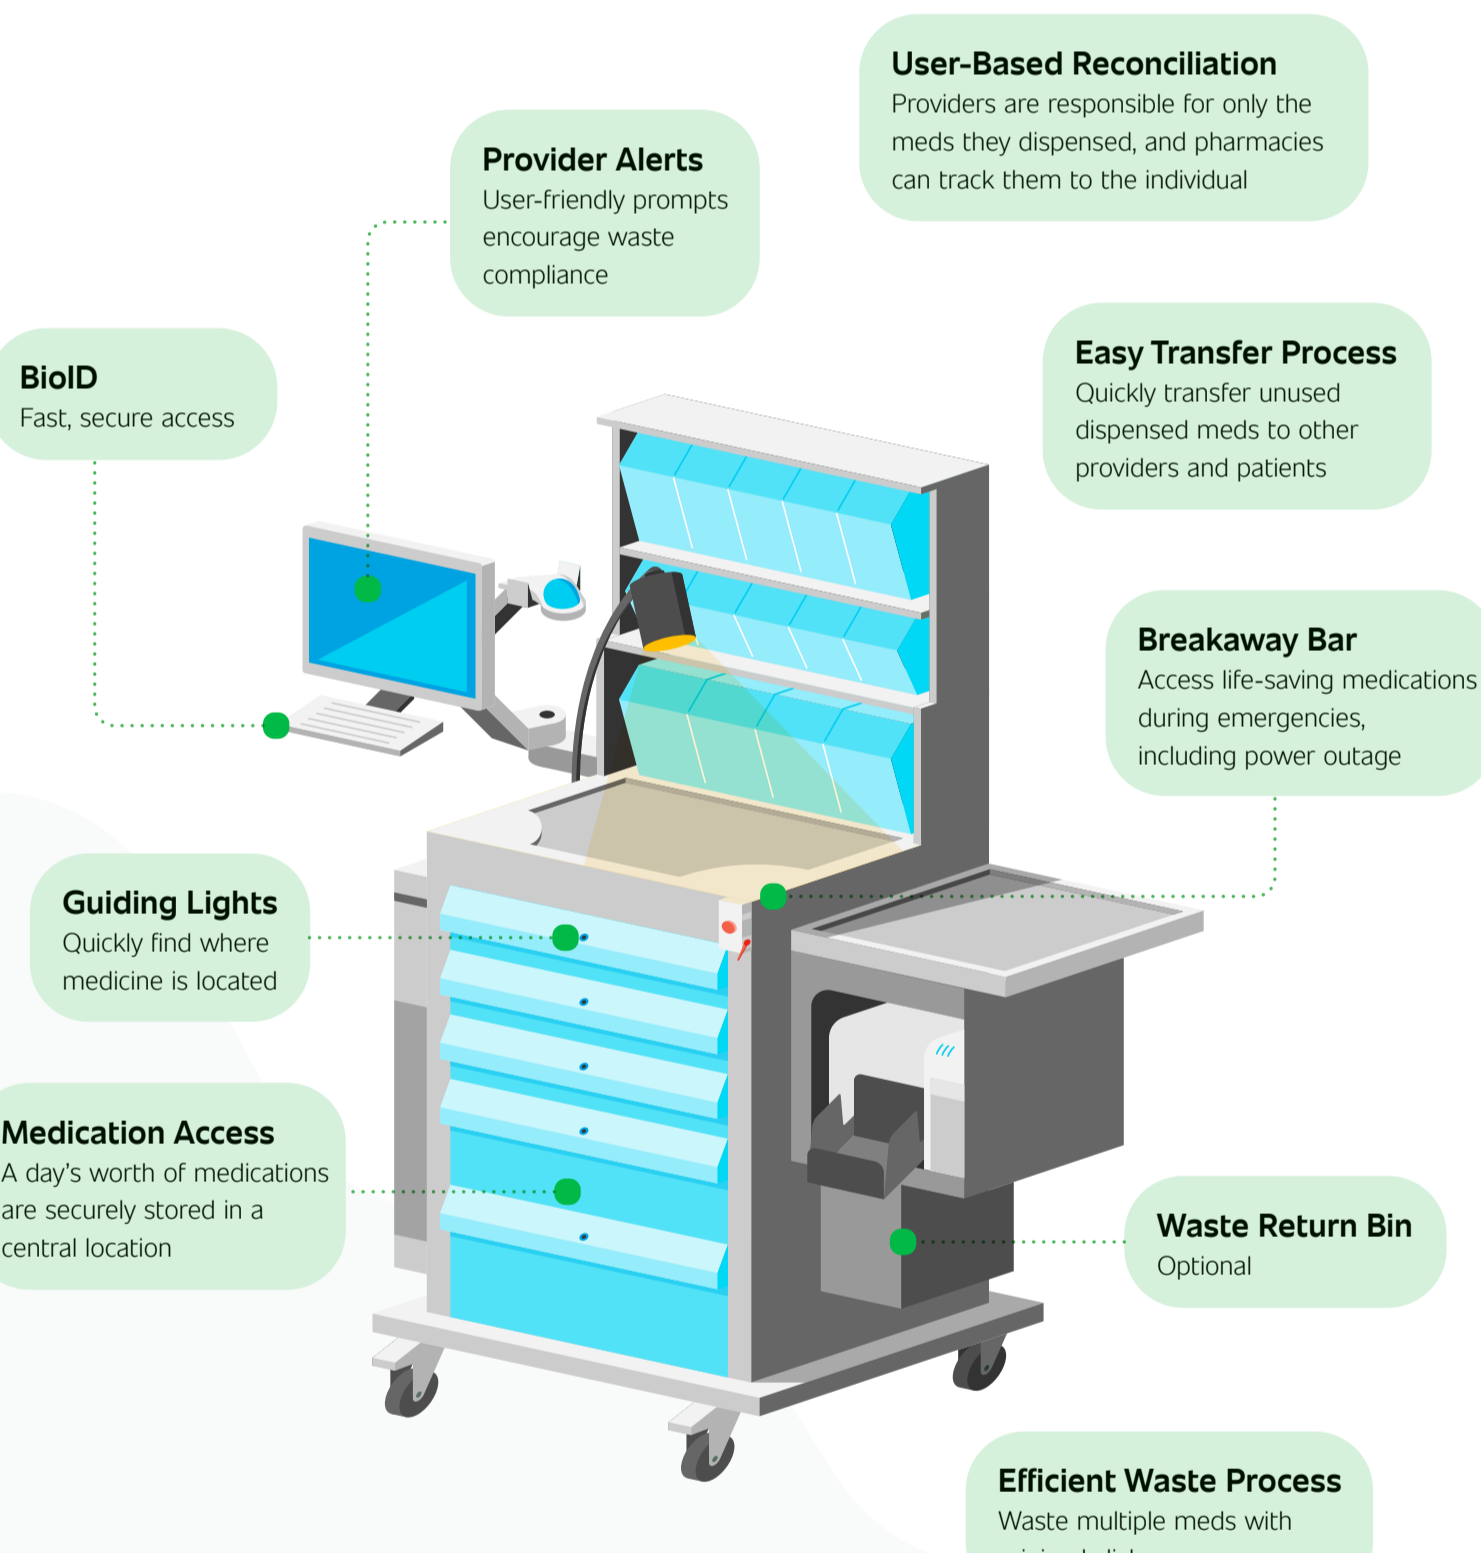

Comprehensive Insights
Pharmacists gain insights into drug distribution throughout their hospital

100%
Visibility

XT Anesthesia Workstation

Designed with security, safety and speed in mind, XT Anesthesia Workstation™ supports a busy OR environment, streamlining the process of preparing, administering, and documenting medication use.

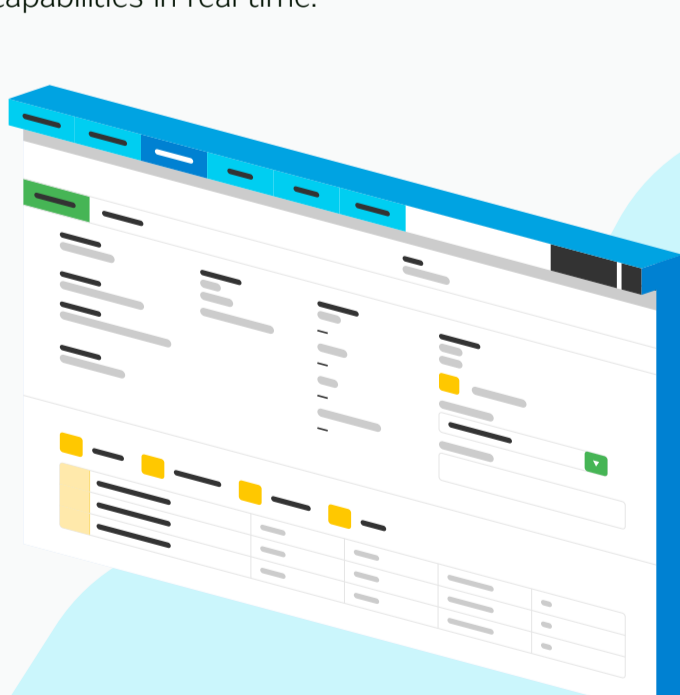

IN THE OPERATING ROOM

IN THE PHARMACY

XT Anesthesia Workstation's web-based dashboards give Pharmacy remote insights and greater diversion tracking capabilities in real time.

- Remote Tracking**
No need for anesthesia providers to track and report usages
- Simplified Electronic Audit Trails**
The workstation is designed to track and log all interactions
- Tightens Chain of Custody**
Through a digital inventory, pharmacies can easily monitor potential diversion
- Speeds Investigations**
If something does go wrong, tracing the issue to its route is as easy as following the audit trail

Baptist Health System Improves OR Oversight

New functionality, including Closed Loop for Anesthesia, helped waste compliance levels by **28%**.

They're now achieving **over 90% compliance**—well on their way to meeting the goal of 100%!

GOAL:
Achieve 100% waste compliance

Streamlined Auditing Process strengthens controlled substance accountability

BEFORE

10%

Checked only 10% of waste transactions retrospectively on monthly basis

AFTER

100%

Checking 100% of waste transactions in real time on daily basis
