

### MTS-350 Semi-Automated Filler and Sealer

# Gain Operational Efficiency by Optimizing Your Pre-Pack Workflow

The Omnicell® MTS-350™ is a flexible, easy-to-use filler and sealer capable of filling most oral medications into a variety of singledose blister card packaging. By enabling your pharmacy technicians to package more than 240 cards per hour, the MTS-350 helps you achieve significant operational efficiency within your pre-pack operation.

## Features

- Package up to 10 times faster than by hand
- Fill a wide range of medications and packaging styles
- Use minimal operator motion
- Provide consistent, quality sealing with temperature and time controls
- Eliminate blister card pressure variant using robust automated sealing station

## Benefits

- Motorized tablet filling system with adjustable speed and easy-to-change brushes
- Tool-less filling system change-over
- Seal station automatically opens when the cycle is complete
- Easy-to-read digital temperature controller
- Stainless steel and anodized aluminum construction allows for easy cleaning

## Expand Your Pre-Pack Capabilities with the Addition of Omnicell Printing Solutions

### License Plate Labeling System

The license plate labeling system perfectly meets the needs of the long-term care pharmacy that requires barcode-scannable labels. Whether you need horizontal labels for standard punch cards, vertical labels for unit dose boxes, special labels for syringes, refrigerated items, compounds and more– this system gives you the flexibility to create it all.

- Design options for identification of narcotics, day of the week, delivery times and more
- Peel-and-present or batch printing options

## Reduce Medication Waste with More Packaging Options

### Unit Dose Foil Labeling System

The unit dose foil labeling system produces high-quality foil lidding containing all pertinent drug information and barcodes, helping you improve efficiency and control costs while meeting the needs of your customers.

- Accommodate diverse packaging needs including unit-dose box, short-cycle dispensing, reclaimable blister cards, eKits and automated dispensing cabinets
- Reduce waste by pre-packing expensive medications into reclaimable blister cards (as allowed by state regulations)

## Break Through Bottlenecks in Pre-Pack with the Label Conveyor Applicator (LCA) System

The LCA System automates the labeling process for your pre-pack operation while delivering reduced labor time and increased pre-pack efficiency. Using a high-speed label applicator system, the label conveyor applicator is used immediately after the packing process to automate the application of the pre-pack label. It prints, positions and sticks the label, guaranteeing perfect placement every time.

Key benefits include:

- Automates your pre-pack operation
- Reduces labor time
- Increases pre-pack efficiency
