

Omnicell and Fresenius Kabi Team Up on Simplist® MicroVault® Dispensing

Omnicell and Fresenius Kabi have teamed up to provide health systems with more flexible ways to store and dispense Simplist® MicroVault® prefilled syringes. The Controlled Substance Dispenser available with Omnicell® XT Automated Dispensing Cabinets now includes cassettes designed to fit 1 mL Simplist MicroVault prefilled syringes.¹

The new cassettes allow you to expand the types of medications used in the Controlled Substance Dispenser, which helps to better manage inventory, reduce the chance of diversion, and save nursing time while streamlining controlled substance management.

Simplist MicroVault Advantages

Simplist MicroVault packaging supports diversion deterrence with a hard plastic shell and provides tamper-evidence with perforated shrink wrap packaging. Simplist ready-to-administer prefilled syringes streamline point-of-care preparation with no assembly required² and are ready to go. The combined effect of Simplist MicroVault with single dose dispensing from the Controlled Substance Dispenser can help save nursing time and leads to fewer opportunities for diversion.

Controlled Substance Dispenser Convenience

Omnicell's Controlled Substance Dispenser is the leading fully automated, high volume unit dose dispensing solution:

- Saves nursing time by eliminating the need for nursing countbacks
- Discourages diversion and increases security of controlled substances
- Supports Joint Commission standards
- Reduces discrepancies by 67% compared to locking lid bins
- Keeps controlled substances safe and secure

1. Requires OmniCenter® and ColorTouch versions 25.5 or higher.
2. Medications that are administered intramuscularly require a needle be attached to the syringe.

New Cassettes Expand Your Options

Controlled Substance Dispenser cassettes for Simplist MicroVault:

- Hold 25 doses per cassette
- Accommodate 1 mL Simplist MicroVault syringes
- Fit seamlessly in existing Controlled Substance Dispenser
