

SPECIALTY PHARMACY SERVICES

Fast-Track Specialty Pharmacy Access, Efficiency, and Profitability

Specialty Pharmacy Services Overview

Grow With Specialty Pharmacy

With **specialty medications expected to eclipse \$316 billion in spending by 2025¹**, launching or optimizing an entity-owned specialty pharmacy is a compelling way for hospitals and health systems to improve patient care while driving profitability.

However, this effort is a heavy lift, requiring significant resources and expertise to manage operational and site logistics, secure accreditations, gain access to specialty drugs, contract with payors, and more.

Omnicell Specialty Pharmacy Services is an experienced partner that can help you navigate these challenges, allowing you to launch, operate, and optimize a specialty pharmacy program quickly and cost effectively.

Turnkey Services to Meet Your Unique Needs

Unlike other vendors that offer a predefined, one-size-fits-all, specialty pharmacy model, Omnicell Specialty Pharmacy Services customizes a solution that is right for you. Our process begins with an optimization assessment where our experts evaluate your current environment and specific needs. The resulting tailored specialty pharmacy program augments your existing strengths and delivers specialized support in targeted areas through the following turnkey services:

Clinical Patient Care

Clinical Patient Liaison & Outreach Programs

Specialty & Traditional Drugs

Pharma Programs & LDD Access

Digital Patient Engagement

The Value of Omnicell Specialty Pharmacy Services

Speed-to-Market

Our dedicated team of experts ensures rapid implementation, delivering a fully operational specialty pharmacy in as little as 6 months.

Improved Access

Through established manufacturer relationships, Omnicell provides your specialty pharmacy with immediate access to LDDs and hundreds of specialty medications, allowing you to better serve patients and optimize clinical outcomes.

Reduced Prescription Leakage

Omnicell Specialty Pharmacy Services tightly integrate with your health system to provide organizational alignment that allows you to capture prescriptions before patients leave the health system, increasing your capture rate and optimizing financial outcomes.

Cost Savings & Profitability

A specialty pharmacy provides a new revenue stream for your organization – one that Omnicell maximizes through 340B discount tracking, optimization, and substantial purchasing power via client volume aggregation.

Better Patient Care & Outcomes

Tightly integrated clinical care processes and direct communication between physicians, pharmacists, and patients improve timely medication access, compliance, adherence, and clinical outcomes.
