

POINT OF CARE

Start Your Journey to Safer, More Intelligent Medication Management

Omnicell XT Automated Dispensing System

The Automated Dispensing System for Greater Control and Visibility

Managing medications is becoming tougher than ever. Rising drug prices. Drug shortages. Expired medication waste. Drug diversion.

And it's affecting what matters most – patient safety and outcomes.

At Omnicell, we are solely focused on improving medication management, giving you greater control and visibility at every point in the process. Our point of care automation solutions remove manual, error-prone steps in workflow, bringing you closer to the Autonomous Pharmacy – a vision to automate medication processes to maximize safety, efficiency, and human potential while ensuring compliance and positive outcomes.

The award-winning XT Automated Dispensing System – at the center of Omnicell's portfolio of automation, intelligence, and technology-enabled services – helps your clinicians reallocate time to higher-value work.

Integrated Intelligence to Optimize Your Cabinet Inventory

Tired of spending hours sifting through reports? Our cloud-based operational dashboards provide visibility to your XT cabinet inventory, making it easy to:

- Quickly locate a medication across your health system
- Track COVID-19 medication use trends
- Identify compliance issues that may indicate drug diversion

Combine the XT Automated Dispensing System with Omnicell One™ to take inventory optimization even further. This powerful intelligence solution leverages predictive and prescriptive analytics to aggregate and analyze data – delivering the visibility, insights, and workflow tools you need to elevate pharmacy performance.

“The reporting, data analysis, and support capabilities through OmniCenter provide our pharmacy and IT folks a greater ability to review, manage, and modify the system down to the cabinet level.”

- **Michael Barton**
Director of Pharmacy, Maury Regional Medical Center

More Cohesive Technology for Efficient Medication Management

Leveraging Your EHR

Omnicell delivers the highest level of interoperability with key electronic health record (EHR) systems. By creating a safer, simpler medication through integration, clinicians have more time to focus on patient care.

57%

Average time saved retrieving first medication from cabinet

Nurses can preselect medications, view availability, and document waste from the EHR

74%

Nurse time saved on identifying controlled substance discrepancies

Nurses and pharmacists can identify variances between medication issues, administrations, and waste via automated reconciliation with the EHR

80%

Pharmacist time saved on identifying controlled substance discrepancies

Harnessing the Power of the Cloud

Omnicell is moving toward a unified cloud-based platform to enable a more intelligent approach to medication management that simplifies implementation and operation for pharmacy and IT. Among the benefits of the cloud? Reduced IT burden, increased security, and easier formulary maintenance.

Smart Self-Monitoring

To maximize uptime and prevent disruption to patient care, XT Automated Dispensing Cabinets use telemetry to monitor overall system status and key components to support proactive maintenance.

Supporting All Areas of Clinical Care

Nursing

Nurses consistently prefer Omnicell cabinets during product comparisons – our safety and time-saving features give them greater confidence in medication administration. Guiding Lights and smart drawer designs allow fast, accurate medication retrieval, and the integrated Medication Label Printer helps prevent errors.

- Faster med passes with Anywhere RN™, which enables remote queuing and wasting
- No narcotic countbacks with Controlled Substance Dispenser – saving thousands of hours a year
- Automated management of patient-specific medications with SinglePointe™ – reduces missing doses by 30%

Pharmacy

Pharmacy is assured of medication security and patient safety with the XT system. Integration with Controlled Substance Manager closes the loop between the pharmacy and point of care, adding greater accountability to the restock process, and diversion analytics are available through our intelligence solutions. Flexible cabinet configurations support ISMP ADC guidelines.¹

- 30% greater capacity compared with similar units on the market – helps ensure medication availability
- Metal locking lid drawers help prevent tampering
- Ability to manage multiple systems on a common platform minimizes IT burden, reduces errors, and simplifies formulary maintenance

Anesthesiology

XT Anesthesia Workstation™ securely stores controlled substances, medications, and supplies in one place with safeguards to help reduce errors. This end-to-end solution provides effective oversight of controlled substances in the OR, balancing clinician convenience with medication security.

- Enhanced waste and transfer workflow reduces time at cabinet by 20%
- Pharmacy dashboards track unreconciled wastes, allowing for quick and easy auditing of controlled substance transactions
